Company Profile

Established in 1972, NIKO is focused on designing developing, producing and marketing high quality sliding door fittings and overhead conveyor systems at the right price. Over 90 % of our products are exported to more than 60 countries worldwide with offices and warehouses in 7 countries worldwide.

Our program range includes more than 2.000 different assemblies & components. Our team of highly qualified engineers are continually working to improve our current product portfolio & extend it according to market requirements.

NIKO enforces a continuous quality control program and is certified according to ISO:9001 and ISO:14001.

NIKO Overhead Conveyor Systems – a versatile and economic solution for loads up to 2.000kg.

The “NIKO” conveyor system provides an economic and flexible solution in conveyor systems for loads up to 2.000 kg. The manual operation of our systems can also be combined with our power chain conveyor in order to power segments or the entire conveyor.

Versatile and reliable overhead handling can be achieved for a variety of applications using the NIKO modular design. Simple to install and easy to expand or relocate according to future requirements. The robust design of our components and the high standards of manufacturing guarantee long life with little or no maintenance requirements. Our program range consists of sliding door fittings, overhead conveyor systems, festoon systems, fall arrest systems and light cranes.

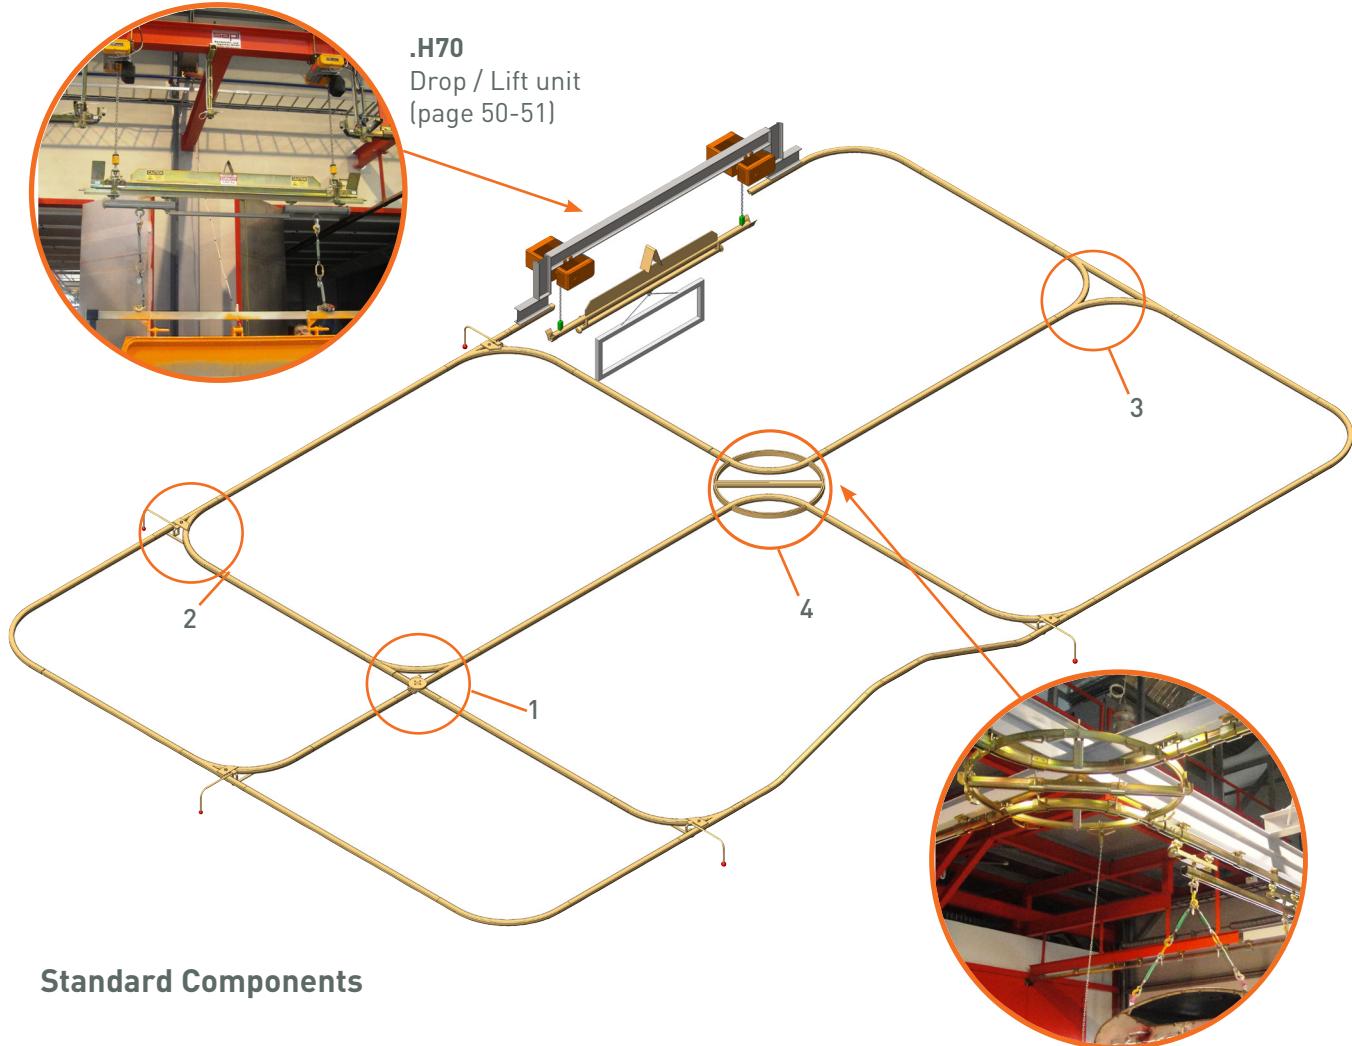

Main Characteristics

- ✓ 5 different profiles and more than 1.000 components to choose from in order to find the best value for money and appropriate solution.
- ✓ Modular design allows for extension and relocation.
- ✓ Possibility to upgrade existing manual conveyors to power solutions with minimal conversion time.
- ✓ Steel components available in gold and silver finish. Stainless steel components are available upon request.
- ✓ Motorised drop lift units reduce product damage and potential injuries to workers.
- ✓ Long life and low maintenance achieved by dust self-cleaning enclosed track profiles and maintenance free bearings.
- ✓ Engineering consultation support is provided in order to find the best solution to every handling problem.

NIKO conveyors are used extensively in applications of painting, rethreading tyres, assembly, production and storage.

Overhead Conveyors Configuration Example

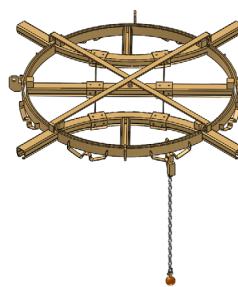

- ✓ Modular system design to accommodate any solution necessary.
- ✓ Minimal maintenance required.

(page 39, page 40)

Power Chain Conveyor

A chain conveyor can be installed parallel to the conveyor carrying the load in order to power the movement. Powered movement can be achieved not only in straight lines but also in bends making it possible to have a completely powered system.

A typical application would be to power the movement through the ovens or painting booths and have the parking areas free in order to load and unload the products in adequate time. The benefits of the power chain conveyor are its competitive price, quiet operation and the fact that it can be added to a manual conveyor at a future stage.

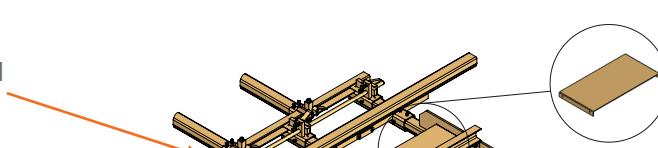

Crane Bridge Wagon

Crane bridge wagons with multiple lines are a popular solution when cross travel is required. They consist of the bridge with multiple lines, interlocks and an operating handle.

For conveyor systems with crane bridge wagon using bridge interlocks not all types of trolleys are suitable. Please ask us for more information.

Component Specifications

NIKO Track Profiles

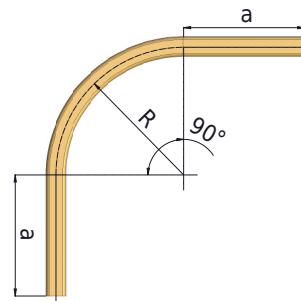

Our wide range of 6 Track profile sizes can accommodate loads up to 2.000 kg. The NIKO enclosed track tapered design allows correct alignment of the trolleys and reduces the possibility of dust build up. This ensures the smooth running of the trolleys and the long life of the conveyor system. NIKO conveyors require only 1-4% force of the weight being lifted in order to operate. For use in special environments we can also offer NIKO tracks & components in stainless steel grade 304 and 316.

NIKO Profile No.	Dimensions			
	h (mm)	b (mm)	d (mm)	s (mm)

General technical notes

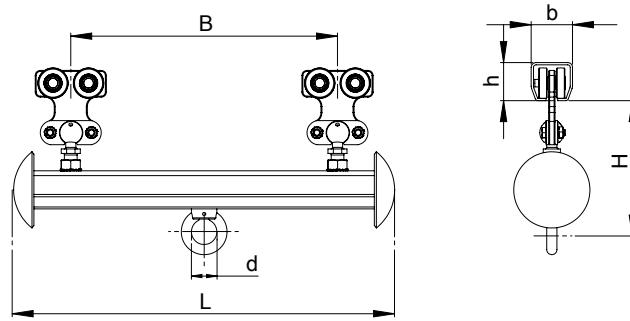

- For better operational efficiency in conveyor systems with bends and switches, NIKO recommends the usage of 4-wheel trolleys.
- Trolleys with rotating screw (e.g. .T14) are recommended for conveyor systems with bends and switches.
- Trolleys with rotating screw (e.g. .T14) are recommended for the assembly of flight bars.

Cruciform Turn Table Switch with electric operation

EL./.A41

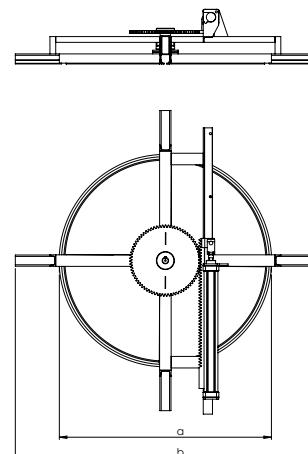

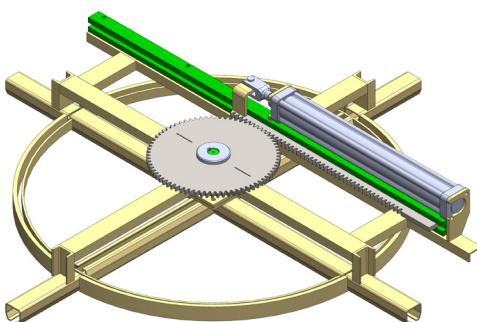

Turn table switches can be powered using motors or pneumatic cylinders.

NIKO Profile No.	23.000	24.000	25.000	26.000
Part No.	EL.23.A41	EL.24.A41	EL.25.A41	EL.26.A41
a (mm)	450	450	600	700
b (mm)	700	850	1100	1340
h (mm)	260	270	350	450

Cruciform Turn Table Switch with pneumatic operation

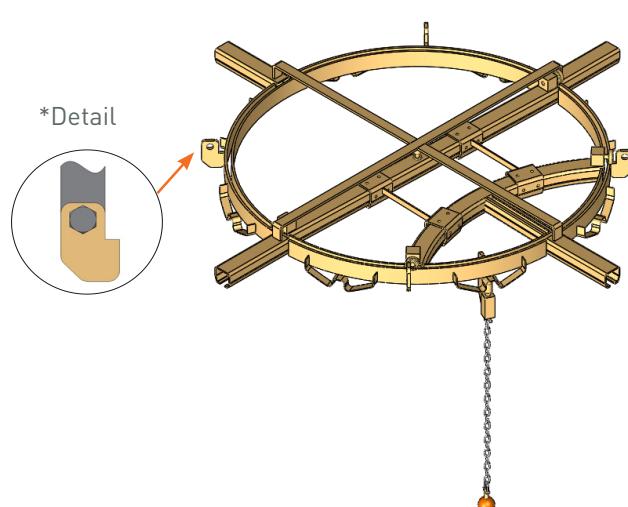

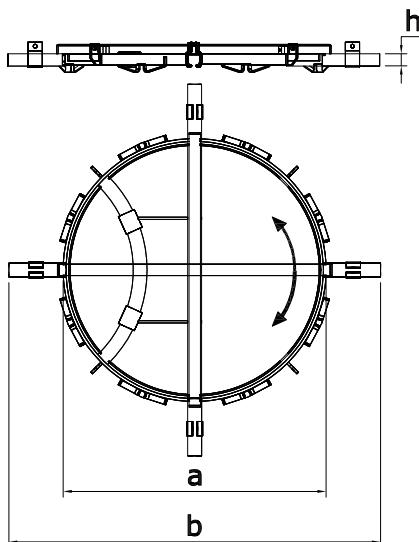

PN./.A41

NIKO Profile No.	23.000	24.000	25.000	26.000
Part No.	PN.23.A41	PN.24.A41	PN.25.A41	PN.26.A41
a (mm)	450	450	600	700
b (mm)	700	850	1100	1340

Multiple Turn Table Switch

.A42

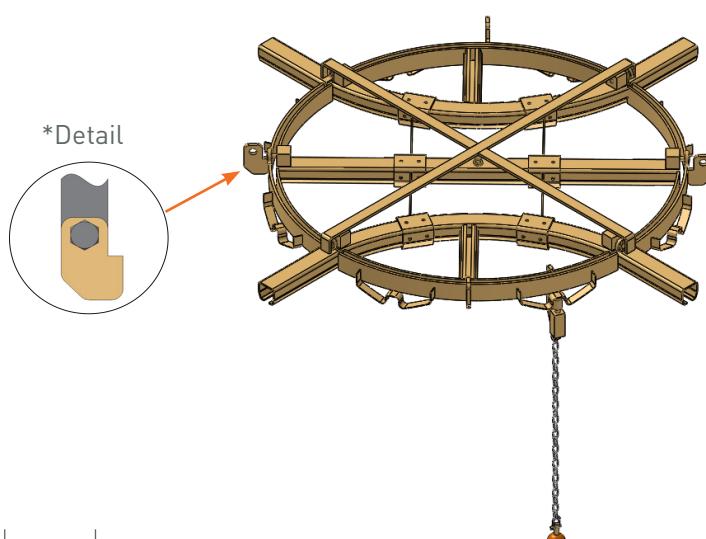

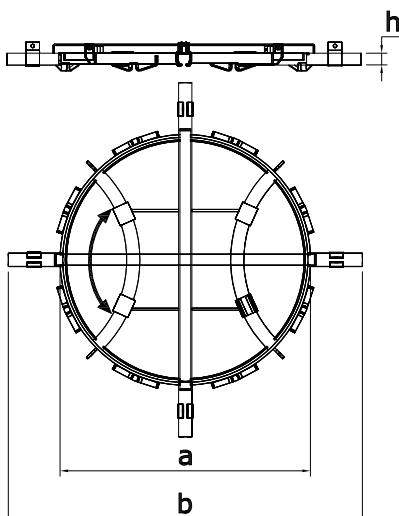

Always support at eight points.

NIKO Profile No.	23.000	24.000	25.000	26.000	27.000
Part No.	23.A42	24.A42	25.A42	26.A42	27.A42
a (mm)	900	900	1300	1600	2000

h (mm)	35	43.5	60	75	110

Multiple Turn Table Switch

.A43

Turntable switches are robust constructions rotating on ball bearings, which are controlled by a chain operated system. The trolley enters the switch when it's locked in one of the positions of passage. These switches incorporate a safe construction that precludes the derailment of trolleys.

NIKO Profile No.	23.000	24.000	25.000	26.000	27.000
Part No.	23.A43	24.A43	25.A43	26.A43	27.A43
a (mm)	900	900	1300	1600	2000
b (mm)	1300	1300	1800	2200	2800
h (mm)	35	43.5	60	75	110

Always support at eight points.

Pneumatic Turn Table Switch (incl. cylinder)

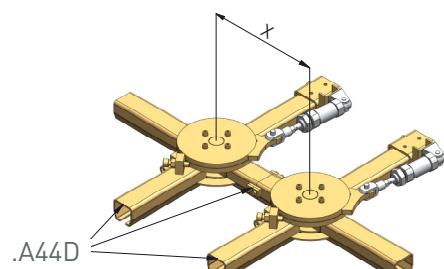

.A44/.A44S/.A44D

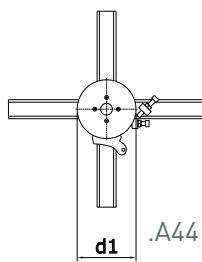

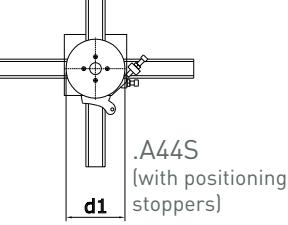

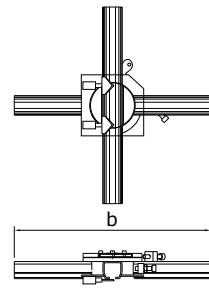

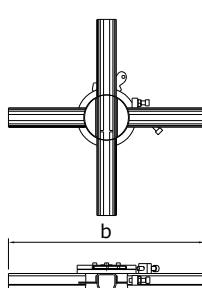

.A44

Detail view of .A44S

.A44D

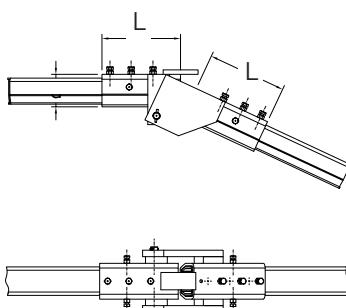

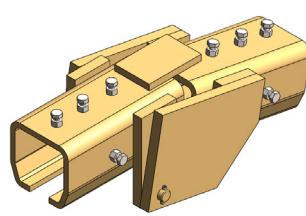

NIKO Profile No.	23.000	24.000	25.000	26.000	27.000
Part No.	23.A44	24.A44	25.A44	26.A44	27.A44
Part No.	23.A44S	24.A44S	25.A44S	26.A44S	27.A44S
b (mm)	500	500	700	800	1000
d1 (mm)	150	150	200	250	350

1. The pneumatic turn table switch .A44 is suitable for 90° rotation and transfer of trolleys.
2. The pneumatic turn table switch .A44S has an additional positioning feature.
3. The pneumatic turn table switch .A44D is a special edition for turn tables switches in line with smaller distance "X".

Articulation Joint

.H08

Placed at the end of the track and used for the lifting or lowering of loads. This function may be hand-operated or assisted by an electric hoist.

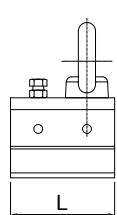

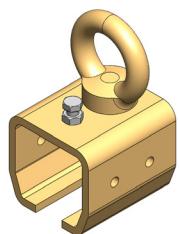

NIKO Profile No.	23.000	24.000	25.000	26.000	27.000
Part No.	23.H08	24.H08	25.H08	26.H08	27.H08
L (mm)	120	150	180	200	250

Ring Support Bracket

.H09

Used in combination with the articulation joint and connected directly to the electric hoist or any other manually operated load-lifting system.

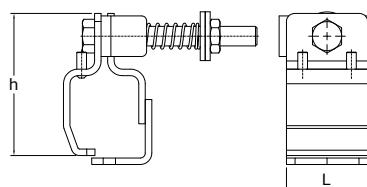

NIKO Profile No.	23.000	24.000	25.000	26.000	27.000
Part No.	23.H09	24.H09	25.H09	26.H09	27.H09

Spring Loaded Stopper

Provided tongue type: A,B,C,D (see below).

NIKO Profile No.	23.000	24.000	25.000	26.000
Part No.	23.H10	24.H10	25.H10	26.H10
L (mm)	50	58	90	110
h (mm)	78	88	132	150

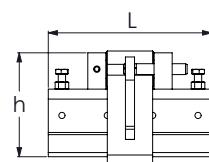

.H10

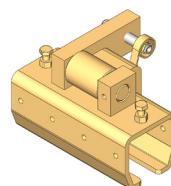

Directional Stopper

Provided tongue type: A,B,C,D (see below).

NIKO Profile No.	23.000	24.000	25.000	26.000	27.000
Part No.	23.H20	24.H20	25.H20	26.H20	27.H20
L (mm)	120	150	180	200	250
h (mm)	70	79	115	133	183

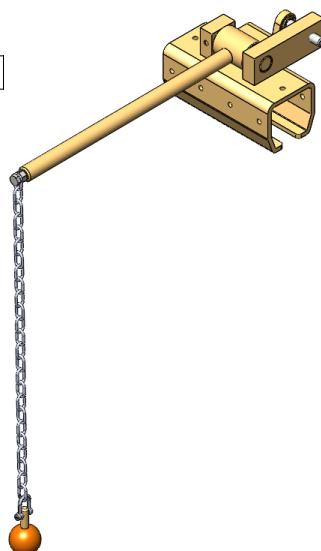

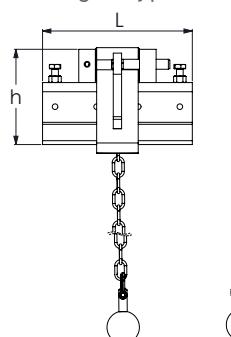

.H20

Stopper with Hand Lever

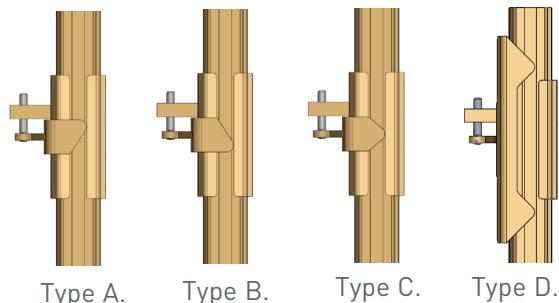

.H60

Used for the safe stopping of trolleys with track transfer assemblies and articulation units. There is a possibility of change in position following installation. The speed of trolleys must be reduced before they reach the stoppers. Provided tongue type: A,B,D (see below).

NIKO Profile No.	23.000	24.000	25.000	26.000	27.000
Part No.	23.H60	24.H60	25.H60	26.H60	27.H60
L (mm)	120	150	180	200	250
h (mm)	70	79	115	133	183

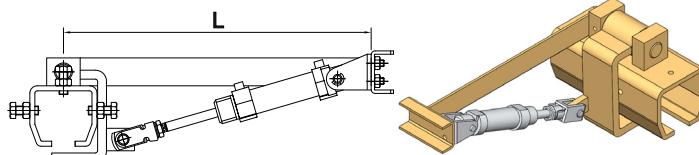

4 Types of tongues

Pneumatic Stopper (incl. cylinder, w/o control switch)

.H63

Drop Lift Unit

Standard Drop-Lift (.H70)

The drop-lift station is supplied as complete kit, including all necessary safety obligations concerning safety of the flight bar.

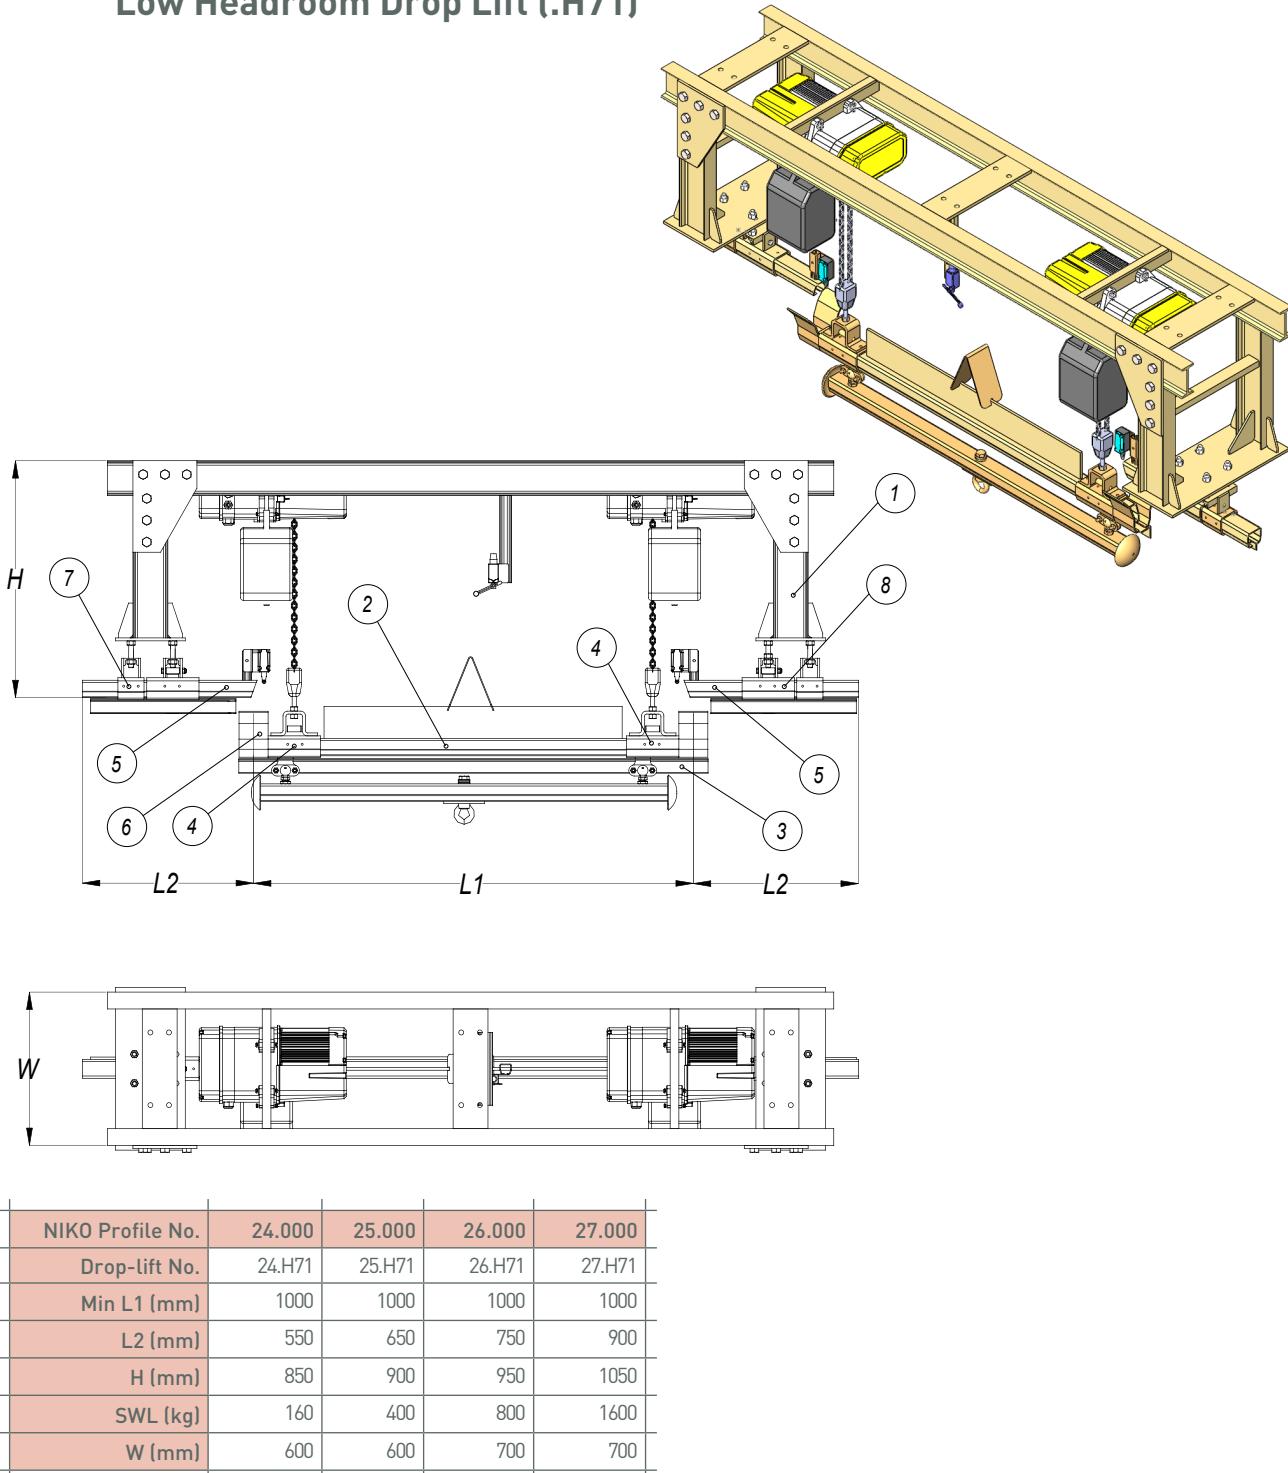

The drop-lift station is no subjection to elevator/lift regulations, because it is used exclusively and only for the transport of goods and is part of a conveyor system.

At both fixed ends of the entrance and exit of the movable track piece there are additional mechanical and pneumatic devices, which close the open ends (when the movable track piece is not in motion). These devices also stop any movement of load carriers, that approach the drop-lift station from the conveyor system.

NIKO Profile No.	24.000	25.000	26.000	27.000
Drop-lift No.	24.H70	25.H70	26.H70	27.H70
Min L1 (mm)	1000	1000	1000	1000

SWL (kg)	160	400	800	1600
W (mm)	600	600	700	700

Drop Lift Main Features:

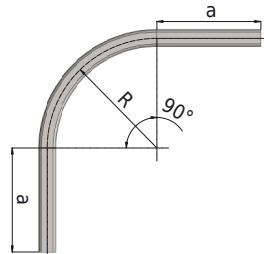

- 1 Mounting frame for the drop-lift station, consisting of beams. (f/n 1).
- 1 Track with diagonally cut ends (moving track piece/ lifting track for rise and descent) (f/n 2).
- 1 Security angled rail with notches for securing and holding the load carrier in place in the lifting track at the rise and descent (f/n 3).
- 2 Special connections for suspension with pressure spring for securing the security angled rail during the rise and descent (f/n 4).
- 2 Fixed track pieces with diagonally cut ends on both sides of the lifting track (f/n 5).
- 2 driver parts for the correct steering and alignment of the lifting track (f/n 6).
- 2 Special adjustable supports for securing the fixed track parts (f/n 7).
- 2 Special pneumatic safety devices for securing/unlocking the security angled rail and bracing of the fixed track pieces (f/n 8).
